Computer Science Project Weekly Progress Report

Surname	Kalegana Koralege
Given Names	Pawani Gayasha
Student ID	23246269
Master/Major	Master of Computing Majoring in AI
Supervisor	Associate Professor Sajib Mistry
Project Title	AI-Powered Deepfake Detection & Media Integrity System
Group Number	3
Reporting Week	**Week3 From 06/03/2026 To 12/03/2026**

What is your own assessment of your progress this week?

Excellent	Good	Fair	Poor	No Progress
	√			

Breakdown of the time spent on the project for this reporting week (add more rows if needed). If you are part of a team, be specific to what you actually did.

Activity	**Number of hours (indicative)**
Team meetings (project discussion & presentation prep)	3
AI research - deep learning techniques for deepfake detection	2
Gathering information for the Methodology in Project Proposal	1.5
TOTAL	5.5 (hours)

Note that as per the unit outline, you are expected to spend at least 8 quality hours per week on this project unit, very much like any 25-credit unit you are studying.

Highlights of the achievements made this week:

- The AI models are trained on industry-standard datasets — FaceForensics++ for video deepfakes.
- Deepfake faces in videos are detected using an AI model called Xception — it analyses each frame and spots unnatural blending or artifacts that human eyes would miss.

Further detail to report to your supervisor, please include any concerns you may have:

None
