Computer Science Project Weekly Progress Report

Surname	Kalegana Koralege
Given Names	Pawani Gayasha
Student ID	23246269
Master/Major	Master of Computing Majoring in AI
Supervisor	Associate Professor Sajib Mistry
Project Title	Content Media Authenticity – Secure video Verification
Group Number	2
Reporting Week	**Week From 13/03/2026 To 19/03/2026**

What is your own assessment of your progress this week?

Excellent	Good	Fair	Poor	No Progress
	√			

Breakdown of the time spent on the project for this reporting week (add more rows if needed). If you are part of a team, be specific to what you actually did.

Activity	**Number of hours (indicative)**
Team meetings (project discussion & project pitch presentation prep)	2.5
Methodology research & planning (AI component)	3
Literature review & background research	2
Presentation preparation for my Methodology section	1
TOTAL	8.5(hours)

Note that as per the unit outline, you are expected to spend at least 8 quality hours per week on this project unit, very much like any 25-credit unit you are studying.

Highlights of the achievements made this week:

- Finalised the core AI concept - confirmed a metadata-based deepfake detection approach using Isolation Forest, a novel unsupervised anomaly detection algorithm that requires only authentic files for training, making it robust to new and unseen deepfake generation methods.
- Designed the metadata extraction framework, which forms the feature engineering pipeline for the AI model. Came to the decision that we will use FaceForensics++ datasets and our own dataset to train the model.
- Prepared the project management presentation slides covering the AI pipeline flow and 8 ethical considerations (privacy, data security, consent, legal evidence use, platform misuse, model bias, right to be forgotten, and access control).

Further details to report to your supervisor, please include any concerns you may have:

None
