Computer Science Project Weekly Progress Report

Surname	Kalegana Koralege
Given Names	Pawani Gayasha
Student ID	23246269
Master/Major	Master of Computing Majoring in AI
Supervisor	Associate Professor Sajib Mistry
Project Title	AI-Powered Deepfake Detection & Media Integrity System
Group Number	2
Reporting Week	**Week2 From 27/02 /2026 To 05/03/2026**

What is your own assessment of your progress this week?

Excellent	Good	Fair	Poor	No Progress
√				

Breakdown of the time spent on the project for this reporting week (add more rows if needed). If you are part of a team, be specific to what you actually did.

Activity	**Number of hours (indicative)**
Team meetings (project discussion & presentation prep)	2
AI research - deep learning techniques for deepfake detection	2
Researching project components for presentation	2
Preparation of my presentation segment	1
Jira task creation & Clockify logging	0.5
TOTAL	7.5(hours)

Note that as per the unit outline, you are expected to spend at least 8 quality hours per week on this project unit, very much like any 25-credit unit you are studying.

Highlights of the achievements made this week:

- Deepfake detection can be approached through multiple modalities - visual (face manipulation), audio (voice cloning), and metadata analysis, and a robust system ideally combines all three
- CNN-based models like XceptionNet and EfficientNet have shown strong performance in detecting facial deepfakes by identifying subtle pixel-level inconsistencies.
- Generalisation is a known problem - models trained on one type of deepfake often struggle with newer generation methods

Further details to report to your supervisor, please include any concerns you may have:

None
